Date Received: May 29, 2008
Use Evaluated: Whole Body Contact Recreation (WBCR)

☐ 4-Hydrologic Modifications.
☐ 5-Natural Physical Features.
☐ 6-Substantial, Widespread Social and Economic Impact.

Use Determination & Recommendation:

Has the use existed since November 28, 1975? ☐ Yes ☐ No ☒ Unknown

Comments: The UAA survey was conducted in April 2008 and no evidence of WBCR was observed. 2005 UAA comments note that wading does occur on this segment during summer months. No interviews were conducted during 2008 UAA.

Is the evaluated use attainable? ☒ Yes ☐ No

Comments: The stream met the maximum depth criterion at 1 of 3 sites. The UAA also notes a pool greater than 1.0 m deep at site #3. Because the maximum depth criterion was met, the committee recommends that the WBCR use be retained. Due to comments citing secondary contact recreation (wading), the committee recommends that the secondary contact recreation use be assigned.

Committee Recommendation:

☐ Add Use ☒ Retain Use ☐ Remove Use
☐ Modify Use ☐ Inconclusive
